Professional Summary

Seasoned, motivated and empathetic Software Engineering Leader with 14+ years of experience in managing and mentoring team, full-stack development, cloud architecture, and AI-driven solutions using both agentic and non-agentic approaches. Proven track record and strong ability to drive project execution and foster collaboration across cross-functional enterprise teams for delivering applications across diverse domains. Skilled in driving digital transformation, modernization and leveraging AI models like OpenAI GPT and Anthropic Claude for intelligent automation. Experienced in using AI agents to seamlessly integrate and extract data from multiple systems, delivering a unified, comprehensive view for our specialist servicing customers - all in one place.

Key Skills

- AI and ML Integration using GPT and Claude models, Azure AI and ML services
- Coding Assistant tools like GitHub CoPilot, Claude Code and OpenAI Codex
- LangChain, LangSmith, Automated Evaluation and Rerankers
- .NET Core, C#, Angular, Node.js, JavaScript, ReactJS, TypeScript, GoLang, CSS, xUnit, NUnit, SpecFlow, Python
- Azure, GCP, AWS, PCF, Kubernetes, Docker, Terraform, Confluent Kafka, RabbitMQ, Veracode, SonarQube
- Microservices Architecture, Event Driven Architecture OOP Design, CI/CD (Azure DevOps, Bamboo), Redis
- SQL Server, Snowflake, MongoDB, Cosmos DB, GCP BigQuery, Informatica, Snowflake, PostgreSQL
- Agile, SAFe Scrum Master, GitHub Copilot, GitLab, Jira, Confluence, VSTS, Git
- Datadog, Splunk, CloudWatch, Okta OpenID, OAuth 2.0, SendGrid Email API, Mimecast Email API, Twilio SMS API

Professional Experience

Senior Engineering Tech Lead | Compass International Holdings, Plano, TX | Aug 2023 – Present

- Led two large engineering teams consisting of full-time employees and vendor resources across onshore, offshore, and near-shore locations-one responsible for a mission-critical microservices-based web application, and one delivering an enterprise-wide Business Capability for transaction and document processing used across multiple Business Units for storage, retrieval, and ingestion of transactions and documents.
- Led a team of engineers to implement aggregation for MLS Data and provide solutions to leverage data for real estate transactions, ensuring data accuracy and availability, which improved agents experience.
- Created systems leveraging AI agents to connect with multiple business capability APIs, consolidating deal, real estate personnel, payment, and client data into a single unified platform for streamlined operations and enhanced customer experience.
- Led the creation of OKRs and quarterly roadmaps for both teams, partnering closely with product owners, business stakeholders, and engineering leadership for alignment, review, and approval.
- Managed an AI-driven document extraction initiative using OpenAI GPT and Anthropic Claude models, achieving $2.6M in cost savings and delivering a nationwide deployment within 3 months.
- Architected enterprise-grade APIs for Title & Settlement partners, integrating Google Places services for enhanced address validation and user experience.
- Designed and developed a scalable, distributed Document Processing & Notifications Business Capability, enabling reuse across multiple enterprise applications, significantly reducing duplicated engineering effort.
- Integrated external partners, including Autonomize AI and Docusign, to enable intelligent document extraction, categorization, and automation.
- Spearheaded migration of legacy BizTalk processes (Email, SMS, Purging, and others) to Azure serverless technologies, reducing operational costs by $200K annually through BizTalk decommissioning.
- Led development of an event-driven enterprise notification system using Confluent Kafka, enabling seamless real-time data ingestion, one-click integration patterns, and high-scale throughput.
- Managed and mentored a global team of 20+ Developers and QA, driving delivery excellence using GitLab, Azure DevOps, and Apigee APIM within an Agile framework.

Senior Project Lead | Charles Schwab, Westlake, TX | Aug 2021 – Aug 2023

- Delivered LiMA analytics platform integrating Google BigQuery for liquidity metrics.
- Migrated Ruby automation to SpecFlow and implemented Bamboo CI/CD pipelines automating entire manual release process for Production rollouts.

- Led 10-member team across onshore/offshore; ensured compliance and security (SAST).
- Championed agile best practices, facilitating sprint planning, retrospectives, and cross-team coordination to ensure timely delivery.
- Collaborated with enterprise architecture and security teams to align solutions with organizational Cloud migration standards and federal regulatory requirements.
- Proactively identified and resolved bottlenecks in development and deployment workflows, improving team velocity and product quality.

Technical Lead | Mindtree Ltd. (USA & India) | Sep 2012 – Aug 2021

- Built Trident modernized brokerage platform processing entire deal lifecycle, agent management and payment processing with microservices and Okta authentication.
- Developed ExpressPay for real-time agent payments and earnings tracking with Fiserv payment platform integration.
- Delivered Polaris HIP system for global HCP contracting lifecycle.
- Mentored team members in adopting cloud services by conducting hands-on PoCs to demonstrate architectural fit and drive cloud-first mindset.

Certifications

- Microsoft Azure AI Fundamentals (AI-900)
- SAFe Certified Scrum Master
- AWS Cloud Practitioner
- Google Professional Cloud Developer
- GitHub Copilot
- Integrate MCP Tools with Azure AI Agents

Education

Visvesvaraya Technological University, India
Bachelor of Engineering - Computer Science - 2008 - 2012
